PROFESSIONAL SUMMARY

Data Analyst with four years of experience in data, BI and automation, and a professional background dating back to 2011. Experienced in turning operational challenges into analyses, dashboards and automated workflows using SQL, Python and PostgreSQL, and in applying enterprise AI to business needs. Track record includes analytical support for **40+ client accounts** and a BI migration that delivered approximately **BRL 43,000 in recurring monthly savings**.

PROFESSIONAL EXPERIENCE

Data Analyst | Hi Platform | Aug 2025 - Present

- Maintain and enhance an **enterprise AI platform**, supporting business teams, configuring and testing **skills**, investigating issues and evaluating API integrations, permissions and responses against source data.
- After transitioning to a permanent role, led the migration from **DashBI to Apache Superset**, rebuilding dashboards and metrics and delivering approximately **BRL 43,000 in recurring monthly savings** while maintaining reporting continuity.
- Built a **customer service operations control tower** using Superset, PostgreSQL and n8n: automated ingestion, source reconciliation, scheduled refreshes and row-level security (RLS), with individual agent access and a consolidated view for supervisors.
- Develop dashboards, KPIs and analyses for bots and digital channels across **40+ client accounts**. Build pipelines with SQL, Python and PostgreSQL, incorporating ETL/ELT, APIs, data validation and communication of findings.
- Processed conversational data in **Python using chunked processing**, preserving conversations across chunks and managing memory usage. Consolidated metrics to identify service failures, integration bottlenecks and content gaps.
- Built a **conversational BI proof of concept** with Python, FastAPI, PostgreSQL and an LLM API, translating natural language into SQL with grounded responses, execution controls and observability.

Business Intelligence Intern | Hi Platform | Feb 2024 - Jul 2025

- Started by maintaining **DashBI reports and dashboards for client accounts**, tracking chatbot and digital channel metrics and supporting specialists with analytical requests.
- Expanded into **SQL and Python** analysis, data preparation, metric definition and automated consolidation, progressing to a Data Analyst role after the internship.

EDUCATION

Postgraduate Specialization in Data Analytics and Artificial Intelligence Applied to Business
FNAT | Faculdade Sirius
Expected start: 12 Jan 2027 | Expected completion: Dec 2027

Bachelor's Degree in Software Engineering
UNOPAR | Completed in 2025

PROFESSIONAL EXPERIENCE (CONTINUED)

Operations Assistant | AppJusto | Jul 2022 - Feb 2024

- Monitored **delivery operations in real time**, handling incidents and coordinating communication among couriers, restaurants and customers to resolve problems and maintain service continuity.
- Analyzed operational data and built **Looker Studio dashboards** to track delivery performance and quality, identify deviations and support decisions involving couriers, restaurants and customers.
- Developed **Python automations** for information collection and organization, prospecting and churn prevention, reducing manual work and structuring data for the team.

PROJECTS AND INITIATIVES

Co-founder | Data and Operational Intelligence | ProcessSurge | 2026 - Present

- Building a data, BI and analytics initiative for e-commerce with a partner, combining automation, metrics and executive insights to support operational control, efficiency and decision-making.
- Designed the architecture using **n8n, PostgreSQL and Apache Superset**, implemented API-integrated pipelines and developed metrics for funnels, abandonment, revenue attribution and sales recovery.

EARLIER EXPERIENCE IN MANUFACTURING AND OPERATIONS

Inventory counts, stock control and material consumption reporting, including reporting to the **Brazilian Federal Police** for operations involving controlled products.

Storeroom Coordinator | Alcance Jeans | Sep 2020 - Feb 2022
Handled all storeroom operations: consumption, system-based replenishment, invoices and monthly closing in Excel.

Storeroom Coordinator | Alphabeto | Nov 2014 - May 2020
Tracked inventory and industrial laundry supplies, received and stored materials, and supported production.

Stockroom Assistant | Confecções Sinder | Aug 2012 - May 2014
Handled work orders and material control; served as a technical resource for fabric lamination.

Stockroom Assistant | Confecções Life | Jan 2011 - Aug 2012
Checked inventory, picked materials and supplied production operations.

TECHNICAL SKILLS

Data and BI: SQL, PostgreSQL, BigQuery, Python, pandas, Apache Superset, Power BI, Looker Studio, Excel and Google Sheets.

Engineering and automation: data modeling, ETL/ELT, pipelines, APIs, n8n, Apps Script, Git/GitHub and data quality.

Analytics: dashboards, KPIs, customer journeys, retention, repeat contacts, abandonment, CSAT, conversational analysis and data storytelling.

Applied AI: LLMs, skills, prompt engineering, NL-to-SQL, FastAPI, response validation, observability and access control.

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

2025: Automation with n8n, Santander.
2024: Data Universe, XP Educação; Power BI Intensive, Hashtag Treinamentos.
2023: Data Structures with Python, UNOPAR; Python Journey, Hashtag Treinamentos.
2022: Complete React and JavaScript ES6+, Origamid.
