OBJECTIVE

Data Analyst | BI, Analytics & Automation

PROFESSIONAL SUMMARY

Data professional with hands-on experience in Business Intelligence, performance analysis, and report automation. Experience building executive dashboards, defining and validating metrics, preparing and exploring datasets, analytical storytelling, and supporting decision-making for digital operations and customer service channels. Hands-on work with SQL, Python, Apache Superset, Hi Boards, Looker Studio, Excel, Google Sheets, BigQuery, dbt, and Apps Script, in addition to participation in automation initiatives and data organization efforts. Co-founder of ProcessSurge, an initiative focused on combining data, BI, and business-oriented automation.

PROFESSIONAL EXPERIENCE

Hi Platform | Data Analyst | Jul/2025 - Present

- Development and maintenance of reports, dashboards, and executive views for bots, digital channels, and customer service operations.
- Performance analysis focused on volume, retention, recontact, abandonment, handling time, operational efficiency, and journey analysis.
- Structuring and validating metrics, supporting dataset modeling, and creating dashboards in Apache Superset / Hi Boards.
- Frequent use of SQL, Python, BigQuery, Excel, Google Sheets, and Looker Studio in analyses, automations, and management reporting deliveries.
- Support in building presentations and executive readouts connecting data, operational context, and business direction.

Hi Platform | Business Intelligence Intern | Feb/2024 - Jul/2025

- Development of performance reports for bots and channels contracted by clients.
- Support in quantitative and qualitative analyses, demand prioritization, data organization, and internal automations.
- Participation in the evolution of dashboards, metrics, and readouts focused on operational performance and stakeholder communication.

AppJusto | Operations Assistant | Jul/2022 - Feb/2024

- Operational support for couriers and restaurants, with a focus on support routines, operational control, and service quality.
- Hands-on experience with operational routines, demand prioritization, and problem-solving in a dynamic environment.

SELECTED PROJECTS AND INITIATIVES

ProcessSurge | Co-founder | Data, BI, and Business-Oriented Automation

- Work focused on data, operational intelligence, dashboards, and KPI structuring for solutions oriented toward efficiency and decision-making.
- Participation in organizing materials, proposing solutions, and building a vision that connects automation, analysis, and results monitoring.

Executive dashboards and performance analysis

- Development of dashboards and analytical readouts to monitor operational metrics, journey behavior, and digital channel performance.
- Building analyses focused on executive clarity, fast reading, and enough depth to support business discussions.

Report automation and data structuring

- Use of Python, SQL, Apps Script, Google Sheets, and other tools to organize data, automate analysis steps, and accelerate recurring deliveries.
- Support in the creation and evolution of datasets and analytical processes to reduce manual rework and increase the reliability of insights.

TECHNICAL SKILLS

Data & BI: SQL, Python, Apache Superset, Hi Boards, Looker Studio, Excel, Google Sheets, Power BI, BigQuery, dbt

Analysis & Automation: Analytical storytelling, metric and KPI definition, report automation, data handling, Apps Script, n8n, data organization

Development & Technical Support: React, JavaScript, APIs, YAML

EDUCATION

- Bachelor's Degree in Software Engineering - UNOPAR | Completed in 2025

COMPLEMENTARY COURSES

- Data Universe - XP Educação (2024)
- Power BI Intensive - Hashtag Treinamentos (2024)
- Data Structures with Python - UNOPAR (2023)
- Python Journey - Hashtag Treinamentos (2023)
- Complete React - Origamid (2022)
- Complete JavaScript ES6+ - Origamid (2022)
