PROFESSIONAL SUMMARY

Data Analyst with 4 years of experience applying data, BI and automation to operational problems. End-to-end work with SQL, Python, PostgreSQL, Apache Superset, Power BI, data modeling, ETL/ELT, executive dashboards, KPIs and data storytelling. At Hi Platform, co-led a BI migration that delivered approximately BRL 43K per month in recurring savings, analyzed more than 40 GB of conversational data and supports more than 40 accounts with analytics and indicators. Co-founder of ProcessSurge, responsible for data and operational intelligence applied to e-commerce.

TECHNICAL SKILLS

Data and BI: SQL, PostgreSQL, BigQuery, Python, pandas, NumPy, Apache Superset, Hi Boards, Power BI, Looker Studio, Tableau, Excel, Google Sheets and dbt

Data engineering and automation: Data modeling, ETL/ELT, data pipelines, API integration, n8n, Apps Script, Git/GitHub, query optimization, data quality and validation

Analytics and visualization: Executive dashboards, KPI definition, operational performance analysis, data storytelling, customer journey, retention, repeat contact, abandonment and CSAT

Applied AI: LLMs, natural language to SQL (NL-to-SQL), prompt engineering, observability, traceability and analytics governance

PROFESSIONAL EXPERIENCE

Data Analyst | **Hi Platform** | Aug/2025 - Present

- Co-led the migration of the DashBI platform to Apache Superset (Hi Boards), rebuilding dashboards and indicators and delivering approximately BRL 43K/month in recurring savings - more than BRL 500K/year - with no loss of analytics continuity.
- Analyzed more than 40 GB of conversational data, including millions of records and over three months of dialogues, identifying behavior patterns, service bottlenecks and actionable business opportunities.
- Develops executive dashboards and recurring analyses for more than 40 accounts, monitoring volume, retention, repeat contact, abandonment, CSAT, bots, digital channels and customer journeys.
- Builds automated SQL and Python pipelines in PostgreSQL, applying ETL/ELT processes and quality validations to improve reliability, traceability and delivery speed.
- Prototyped a conversational BI layer connecting natural language, LLMs and SQL generation, enabling questions about analytics data with traceable answers, explicit limits, observability and governance.
- Translates complex analyses into executive presentations and narratives for stakeholders and leadership, connecting operational evidence to business decisions and priorities.

Business Intelligence Intern | **Hi Platform** | Feb/2024 - Jul/2025

- Developed performance dashboards for chatbots and digital operations, analyzing conversational flows, resolution, friction points and user experience.
- Conducted quantitative and qualitative analyses with SQL, Python and visualization tools, supporting demand prioritization and data-informed product evolution.
- Structured metrics and improved dashboards based on business requirements and stakeholder feedback, strengthening indicator adoption.

Operations Assistant | AppJusto | Jul/2022 - Feb/2024

- Supported the operation of a delivery platform, assisting couriers and restaurants, monitoring service quality and connecting real operational issues to improvement opportunities.
- Built Looker Studio dashboards to monitor courier, restaurant and consumer metrics, increasing operational visibility.
- Developed automations for courier prospecting and restaurant churn prevention, reducing manual work and supporting data-informed continuous improvement.

EARLIER EXPERIENCE - INDUSTRY AND OPERATIONS

Warehouse Supervisor | Alcance Jeans | Sep/2020 - Feb/2022

- Managed inventory and industrial supply consumption using Excel controls, supplier coordination, monthly reports and controlled-product accountability, developing strong documentation discipline, accuracy and operational responsibility.

Warehouse Supervisor | Alfabeto | Nov/2014 - May/2020

- Managed inventory, receiving and control of industrial laundry chemical supplies, using Excel and operational records to track regulated materials, with autonomy over the area and direct production support.

Warehouse Assistant | Confeccoes Sinder | Aug/2012 - May/2014

- Became a technical reference for the fabric bonding process, organizing work orders, supporting team coordination and leading night shifts during peak-demand periods.

Warehouse Assistant | Confeccoes Life | Jan/2011 - Aug/2012

- Started a professional career in internal logistics and production supply, handling material separation and fractioning, inventory organization and support for industrial workflows.

PROJECTS AND INITIATIVES

Co-founder - Data and Operational Intelligence | ProcessSurge | 2026 - Present

- Leads the data, BI and analytics function for e-commerce operations, connecting automation, indicators and executive insight to support growth and operational efficiency.
- Designed a BI architecture with n8n, PostgreSQL and Apache Superset, separating operational and analytical schemas to create a modular, scalable foundation.
- Implemented ETL pipelines integrated with e-commerce APIs, including Nuvemshop, processing thousands of daily records with validation and reliability.
- Developed dashboards covering conversion funnels, cart abandonment, revenue attribution, recovery indicators and sales optimization.

EDUCATION

Bachelor of Science in Software Engineering | UNOPAR | Completed in 2025

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- n8n Automation - Santander (2025)
- Data Universe - XP Educacao (2024)
- Power BI Intensive - Hashtag Treinamentos (2024)
- Data Structures with Python - UNOPAR (2023)
- Python Journey - Hashtag Treinamentos (2023)
- Complete React - Origamid (2022) | Complete JavaScript ES6+ - Origamid (2022)
