PROFESSIONAL SUMMARY

Data Analyst with 4 years of direct experience applying data, BI and automation to operational problems, supported by a professional career beginning in 2011. End-to-end work with SQL, Python, PostgreSQL, Apache Superset, Power BI, data modeling, ETL/ELT, dashboards, KPIs and executive communication. Results include approximately BRL 43K/month in recurring savings, analysis of more than 40 GB of conversational data, analytics support for 40+ accounts and products using applied AI and identity-based access control.

TECHNICAL SKILLS

Data and BI: SQL, PostgreSQL, BigQuery, Python, pandas, Apache Superset, Hi Boards, Power BI, Looker Studio, Excel and Google Sheets

Data engineering and automation: Data modeling, ETL/ELT, pipelines, API integration, n8n, Apps Script, Git/GitHub, data quality and validation

Analytics: Executive and operational dashboards, KPI definition, audits, bots, customer journey, retention, repeat contact, abandonment, CSAT and data storytelling

Applied AI: LLMs, NL-to-SQL, FastAPI, prompt engineering, observability, traceability, guardrails and analytics governance

PROFESSIONAL EXPERIENCE

Data Analyst | Hi Platform | Aug 2025 - Present

- Built an end-to-end Control Tower for a service operation using Apache Superset, PostgreSQL, and n8n, combining an operational TV dashboard with a single performance dashboard for supervisors and operators; implemented automated ingestion, source reconciliation, recurring refreshes, and dynamic row-level security so each operator could access only their own data while supervisors retained the consolidated view.
- Led and executed the end-to-end migration from DashBI to Apache Superset (Hi Boards), rebuilding dashboards and indicators and delivering approximately BRL 43K/month in recurring savings with no loss of analytics continuity.
- Develop dashboards, KPIs and analyses for bots, digital channels and 40+ accounts, combining data collection, processing, validation, audits and insight communication with specialists, stakeholders and leadership.
- Analyzed more than 40 GB of conversational data across millions of records, identifying behavior patterns, service bottlenecks and actionable business opportunities.
- Build automated SQL and Python pipelines in PostgreSQL, applying ETL/ELT, source reconciliation and quality checks to improve reliability, traceability and delivery speed.
- Built an end-to-end conversational BI proof of concept using Python, FastAPI, PostgreSQL, SQL and an LLM API in an NL-to-SQL flow with grounded answers, guardrails, observability and governance.

Business Intelligence Intern | Hi Platform | Feb 2024 - Jul 2025

- Developed performance dashboards for chatbots and digital operations, analyzing conversational flows, resolution, friction points and user experience.
- Conducted quantitative and qualitative analysis with SQL, Python and visualization tools and structured metrics from business requirements and stakeholder feedback.

RAFAEL ROCHA

Data Analyst | Business Intelligence | Analytics

Ubá, MG, Brazil | +55 32 99814-7576 | rafaelolirocha@gmail.com

PROFESSIONAL EXPERIENCE — CONTINUED

Operations Assistant | AppJusto | Jul 2022 - Feb 2024

- Worked in a digital delivery platform connecting operations, data and continuous improvement; monitored service quality and turned day-to-day problems into improvement opportunities.
- Built Looker Studio dashboards for courier, restaurant and consumer metrics and developed Python automation for prospecting and churn prevention, reducing manual work.

EARLIER EXPERIENCE — INDUSTRY AND OPERATIONS

Warehouse Supervisor | Alcance Jeans | Sep 2020 - Feb 2022

- Managed inventory, industrial supply consumption, suppliers, Excel controls, monthly reports and controlled-product accountability.

Warehouse Supervisor | Alphabeto | Nov 2014 - May 2020

- Managed inventory, receiving and chemical supplies, operational records, regulatory reporting and direct production support.

Warehouse Assistant | Confecções Sinder | Aug 2012 - May 2014

- Became a technical reference in fabric bonding, organized work orders and led night shifts during peak demand.

Warehouse Assistant | Confecções Life | Jan 2011 - Aug 2012

- Started a career in internal logistics, material separation and fractioning, inventory organization and production supply.

PROJECTS AND INITIATIVES

Co-founder — Data and Operational Intelligence | ProcessSurge | 2026 - Present

- I co-build an entrepreneurial data, BI and analytics initiative for e-commerce, connecting automation, indicators and executive reporting to support control, efficiency and decision-making.
- Designed an architecture using n8n, PostgreSQL and Apache Superset, implemented API-integrated pipelines and built funnel, cart abandonment, revenue attribution and sales recovery indicators.

EDUCATION

Bachelor of Science in Software Engineering | UNOPAR | Completed in 2025

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

n8n Automation — Santander (2025) | Data Universe — XP Educação (2024) | Power BI Intensive — Hashtag Treinamentos (2024)
Data Structures with Python — UNOPAR (2023) | Python Journey — Hashtag Treinamentos (2023) | Complete React and JavaScript ES6+ — Origamid (2022)
