RAFAEL ROCHA

Data Analyst | Business Intelligence | Analytics

Ubá, Minas Gerais, Brazil | +55 32 99814-7576 | rafaelolirocha@gmail.com

linkedin.com/in/rafael-rocha-89271021b | rafaeloliveirarocha.github.io

PROFESSIONAL SUMMARY

Data Analyst with 4 years of experience applying data, BI, automation, and AI to operational challenges. End-to-end experience with SQL, Python, PostgreSQL, Apache Superset, Power BI, data modeling, ETL/ELT, APIs, data pipelines, executive dashboards, KPI design, and data storytelling. At Hi Platform, key outcomes include a BI migration delivering approximately BRL 43K in recurring monthly cost savings, analysis of a 40+ GB conversational dataset, and recurring analytics support for 40+ client accounts. Co-founder of ProcessSurge, leading data and operational intelligence initiatives for e-commerce.

TECHNICAL SKILLS

Data and BI: SQL, PostgreSQL, BigQuery, Python, pandas, NumPy, Apache Superset, Hi Boards, Power BI, Looker Studio, Tableau, Excel, Google Sheets, and dbt

Data engineering and automation: Data modeling, ETL/ELT, data pipelines, API integration, n8n, Apps Script, Git/GitHub, query optimization, data quality, and validation

Analytics and visualization: Executive dashboards, KPI design, operational performance analysis, data storytelling, customer journey, retention, repeat contact, abandonment, and CSAT metrics

Applied AI: LLMs, natural language to SQL (NL-to-SQL), prompt engineering, observability, traceability, and analytics governance

PROFESSIONAL EXPERIENCE

Data Analyst | Hi Platform | Aug 2025 - Present

- Co-led the migration from the DashBI platform to Apache Superset (Hi Boards), rebuilding dashboards and KPIs and delivering approximately BRL 43K in recurring monthly cost savings - over BRL 500K annually - without disrupting analytics continuity.
- Analyzed more than 40 GB of conversational data across millions of records and over three months of customer interactions, uncovering behavioral patterns, support bottlenecks, and actionable business opportunities.
- Develop executive dashboards and recurring analyses for 40+ client accounts, monitoring volume, retention, repeat contact, abandonment, CSAT, bots, digital channels, and the customer journey.
- Designed a financial data integration connecting an ERP, APIs, n8n, and PostgreSQL, with RAW, Silver, and Gold layers to preserve history, ensure traceability, and power a decision-support analytics application.
- Build automated SQL and Python pipelines in PostgreSQL, applying ETL/ELT processes and data quality checks to improve reliability, traceability, and delivery speed.
- Prototyped a conversational BI layer combining natural language, LLMs, and SQL generation to deliver traceable answers with explicit boundaries, observability, and governance.
- Translate complex analyses into executive presentations and data narratives for stakeholders and leadership, connecting operational evidence to business decisions and priorities.

Business Intelligence Intern | Hi Platform | Feb 2024 - Jul 2025

- Developed performance dashboards for chatbots and digital operations, analyzing conversational flows, resolution, friction points, and user experience.
- Performed quantitative and qualitative analyses using SQL, Python, and visualization tools, supporting demand prioritization and data-informed product development.
- Defined metrics and improved dashboards based on business requirements and stakeholder feedback, strengthening adoption of performance indicators.

Operations Assistant | AppJusto | Jul 2022 - Feb 2024

- Supported the operations of a delivery platform serving couriers and restaurants, monitoring service quality and connecting day-to-day operational issues to improvement opportunities.
- Built Looker Studio dashboards to track courier, restaurant, and consumer metrics, increasing operational visibility.
- Developed automation workflows for courier prospecting and restaurant churn prevention, reducing manual work and supporting continuous data-driven improvement.

EARLIER EXPERIENCE - INDUSTRY AND OPERATIONS

Warehouse Operations Lead | Alcance Jeans | Sep 2020 - Feb 2022

- Managed industrial supplies inventory and consumption using Excel-based controls, supplier coordination, monthly reporting, and regulated-product accountability, strengthening documentation rigor, accuracy, and operational ownership.

Warehouse Operations Lead | Alphabeto | Nov 2014 - May 2020

- Managed receiving, inventory, and chemical supplies for an industrial laundry operation, using Excel and operational records to track regulated materials while independently supporting production.

Warehouse Assistant | Confecções Sinder | Aug 2012 - May 2014

- Progressed into a technical reference for the fabric lamination process, organizing work orders, supporting team coordination, and leading night shifts during high-demand periods.

Warehouse Assistant | Confecções Life | Jan 2011 - Aug 2012

- Started professional career in internal logistics and production supply, handling material separation, portioning, organization, and shop-floor support.

PROJECTS AND INITIATIVES

Co-founder - Data and Operational Intelligence | ProcessSurge | 2026 - Present

- Lead data, BI, and analytics initiatives for e-commerce operations, connecting automation, performance indicators, and executive insight to support growth and operational efficiency.
- Designed a modular BI architecture with n8n, PostgreSQL, and Apache Superset, separating operational and analytical schemas for scalability.
- Implemented ETL pipelines integrating e-commerce APIs, including Nuvemshop, and processing thousands of daily records with validation and reliability controls.
- Developed dashboards covering conversion funnels, cart abandonment, revenue attribution, recovery performance, and sales optimization.

EDUCATION

Bachelor of Software Engineering | **UNOPAR** | Completed Jul 2025

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- Automation with n8n - Santander (2025)
- Data Universe - XP Educação (2024)
- Power BI Intensive Program - Hashtag Treinamentos (2024)
- Data Structures with Python - UNOPAR (2023)
- Python Journey - Hashtag Treinamentos (2023)
- Complete React - Origamid (2022) | Complete JavaScript ES6+ - Origamid (2022)
